## NUCLEAR SAFETY EXPERT TO INFORM LOCAL LEADERS

**SCOTTSBORO, AL**--- On Monday, February 4, Mr. David Lochbaum, Union of Concerned Scientists (UCS) Director of Nuclear Safety, will bring a Nuclear Safety - Nuclear History presentation to the Jackson County Commission, at 5PM Central Time at the Jackson County Courthouse. His presentation will be repeated at the Scottsboro City Council, Scottsboro City Hall at 6PM Central Time. Lochbaum, a nuclear engineer, is one of the nation's top independent nuclear power experts. He regularly testifies before Congress and the Nuclear Regulatory Commission (NRC) and provides informed analysis of nuclear plant conditions and incidents. He formerly was employed at Browns Ferry Nuclear Plant.

"We believe that Mr. Lochbaum's presentation of nuclear power safety and history will provide local leadership a greater understanding of nuclear power issues for better decision-making regarding the Bellefonte Alabama Nuclear Power Facility," said Garry Morgan, a Scottsboro member of Bellefonte Efficiency & Sustainability Team, a local chapter of the Blue Ridge Environmental Defense League.

The Union of Concerned Scientists neither opposes or supports the generation of electricity by nuclear power.
